

# Morphed face images database release agreement

The morphed face images database (henceforth, “database”) contains images used for the detection of face morphing attacks. To foster the research of face morphing attack detection, the database will be released to researchers for academic research purpose upon request. Please read the following consent before getting access to the database.

## Consent

By signing this agreement, the researcher(s) agrees to the following restrictions:

1. The database, in whole or in part, may not be further distributed, published, copied, or disseminated in any way or form whatsoever, whether for profit or not. This includes, but not limited to, further distributing, copying or disseminating to a different facility or organizational unit within the requesting university, organization, or company.
2. The database, in whole or in part, may not be modified or used for commercial purposes.
3. The images of all the data subjects in the database are only allowed for demonstration in academic publications and presentations. Those seeking to include renderings of more than 10 images from the database in reports, papers, and other documents to be published or released must first obtain approval in writing from the authors of the database. In no case should the face images be used in a way that could cause the original data subject embarrassment or mental anguish. No attempts may be made to identify or contact the data subjects depicted in the database.
4. The following citation is included in the documents and papers that report on research that uses the database.  
F. Peng, L. Qin, and M. Long. Face morphing attack detection and localization based on feature-wise supervision. Currently under review.
5. The researcher(s) using the database agrees to indemnify, defend, and hold harmless the authors of the database, individually and collectively, from any and all losses, expenses, damages, demands and/or claims based upon any such injury or damage (real or alleged) related to, and pay all damages, claims, judgments or expenses resulting from the researcher’s use of the database. The authors of the database cannot be held accountable for any damage (physical, financial or otherwise) caused by the use of the database.
